## DIRECTIONS FOR USE

### Surface preparation:

Ensure that the surface is free from dust, dirt, loose particles and moisture.

Wipe clean and make sure the surface is dry fully. One or two coats of primer can be used depending on the requirement. For best results, it is advisable to give 10-12 hours drying time before application of subsequent coats. Do not over thin. Stir well before use.

### Application Process:

Apply 1 coat of primer after diluting properly & straining through a clean sieve. Apply it on the substrate by brush or spray.
